Github: <https://github.com/cristina-gorrino> | **Linkedin:** <https://www.linkedin.com/in/cristina-gorrino/> | **Portfolio:** <https://cristina-gorrino.github.io/professional-portfolio-react/>

Web developer passionate about expanding access to technology for under-served communities. Recently earned a Certificate in Full Stack Web Development from UCSD Extension, and energized by continued learning in the tech space, and applying my skills in HTML, CSS, and JavaScript to innovative projects. Developed skills as a detail-oriented individual contributor, and experience in user-centric design, software testing and data analysis using SQL and R. Capable of quickly understanding the big picture of a project, deploying information and communicating with team members effectively to achieve project objectives.

SKILLS

Languages and technologies: HTML, CSS, JavaScript, JQuery, Bootstrap, Node.js, Express, React, R, Java, Capybara, Minitest

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, Heroku, BrowserStack, JIRA admin tools, Slack

Languages: Fluent in English and Spanish - bilingual native proficiency, French - professional proficiency

PROJECTS

Meals Easy:

- An app where users can browse recipes and purchase all ingredients for fast and easy cooking at home. E-commerce app built with Node, Sequelize and Express.

GitHub Repo: <https://github.com/cristina-gorrino/meals-easy>

Deployed App: <https://meals-easy.herokuapp.com/>

Recipe Roulette:

- An app where users can use search or random selection to find recipes. Technologies used: JavaScript and the Edamam and Spoonacular APIs.

GitHub Repo: <https://github.com/cristina-gorrino/recipe-roulette>

Deployed App: <https://cristina-gorrino.github.io/recipe-roulette/>

Lightning notes:

- This is a note-taking app made with React.js that allows users to create notes under different categories, edit notes, and easily mark important notes as starred.

GitHub Repo: <https://github.com/cristina-gorrino/lightning-notes>

Deployed App: <https://aqueous-everglades-37857.herokuapp.com/>

EXPERIENCE

PRODUCT & COMMUNITY ORGANIZER, GETYOURREFUND.ORG MARCH 2021-JULY 2021 Remote

- Coordinate volunteer efforts to help achieve the objectives of the Get Your Refund team at Code for America. Responsible for volunteer outreach, onboarding and ongoing communications.
- Liaison between staff and volunteers acting as project manager for project requests including information gathering, task assignment, and driving to conclusion

QUALITY ENGINEER, JUNTOS, INC – 2017– December 2020 San Carlos,CA

As sole QA representative on the engineering team:

- Conducted manual tests across array of locales, OS, browsers and devices using BrowserStack tools
- Maintained bug backlog and advocated for quality during Agile sprints
- Wrote UI tests for client-facing conversation platform and dashboard products
- Developed test plans and quality tracking dashboards to share QA efforts company-wide

As QA specialist for the text message conversation product:

- Built dynamic SQL queries to monitor message delivery and content accuracy
- Designed specialized workflows using JIRA admin tools to clarify review processes for content team and improve customer interactions with conversation product
- Created technical documentation used as reference and training material by Operations team

DATA ANALYST, JUNTOS, INC – 2015–2017 San Carlos, CA

- Prepared client data for ETL process and maintained data definitions for segmentation analysis
- Collaborated with Account Managers to report results of each partnership and analyzed experiment- level data to recommend best path for future conversations to Content team

OPERATIONS SPECIALIST, JUNTOS, INC – 2013–2017 San Carlos, CA

- Programmed the logic of interactive SMS conversations using proprietary tools and tested those conversations for accuracy and design compliance.
- Later trained new team members in this role and became expert on best practices for conversation programming
